

# Tube Watch

## Reduce disruptions. Enhance care.

### Don't allow tube failures to disrupt patient care.

Tube Watch is GE Healthcare's predictive solution that is designed to remotely monitor and predict tube failures before any disruption occurs and repairs systems remotely or at a more convenient time. It delivers peace of mind by converting potential unplanned downtime to planned events helping to avoid patient and staff disruptions and associated revenue loss. Tube Watch allows proactive part delivery and service scheduling to avoid tube failure and gets the scanner restored. If a tube fails unexpectedly, we guarantee you the full credit of your annual Tube Watch premium.<sup>1</sup>

What is the cost of an unexpected tube failure?

**>40**

Average lost scans due to an unexpected tube failure<sup>2</sup>

**\$64,000**

Estimated annual value of total revenue losses from tube failure<sup>2,3</sup>

**>5%**

Increased cost from staff overtime<sup>2</sup>

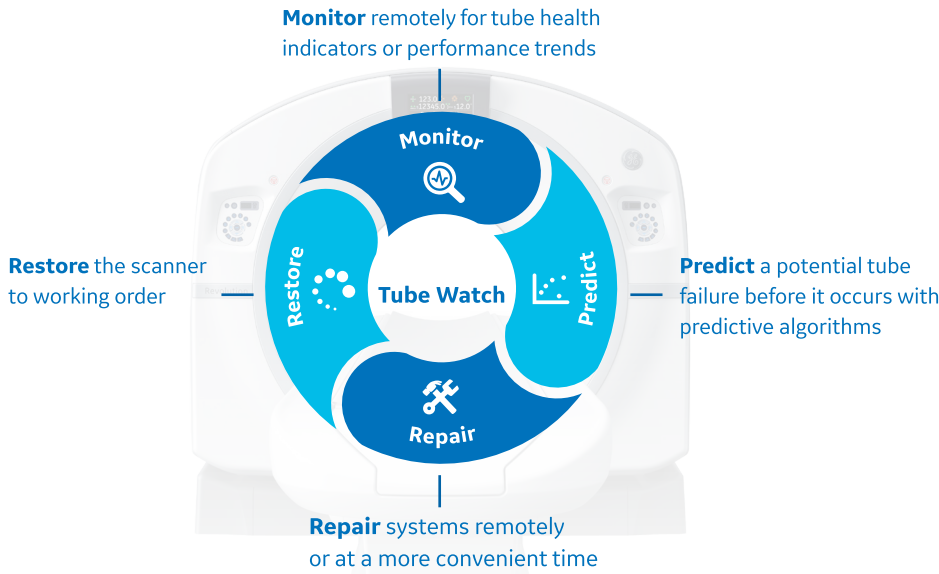

<sup>1</sup>Guarantee is subject to the terms in your Statement of Service Deliverables.

<sup>2</sup>Primary market research conducted by GE Healthcare with 10 customers.

<sup>3</sup>Both direct and indirect revenue loss impact

## How it works

Tube Watch represents the Predict services of our Asset Performance Management Suite, and is available for Revolution™ EVO and Optima™ CT660 with Performix™ Plus tube.

## Why GE?

### Proactive

Gain predictive insights to tube health

### Efficient

Drive to achieve zero unplanned downtime

### Responsive

Service expertise and blended service model (remote & onsite)

### Collaborative

Risk sharing partnership
